Software Quality Assurance (SQA) Track

Day 5 – REST API Testing Using Postman

(Bug Report)

Submitted By:
Eshal Kamal

Internship Duration:
60-Day Internship Bootcamp

Organization:
HisabDo

Submission Date:
5th August, 2026

Bug Report 1:

Attribute	Description
Bug ID	BUG-01
Bug Title	API allows updating a non-existing product
Related Test Case ID	TC-07
API/Endpoint	/products/9999
Method	PUT
Severity	High
Priority	High
Steps to Reproduce	1. Send a PUT request to /products/9999 with valid product details. 2. Observe the response.
Expected Result	The API should return 404 Not Found or an appropriate error indicating that the product does not exist.
Actual Result	The API returned 200 OK and accepted the update request for a non-existing product.
Status	Open

Bug Report 2:

Attribute	Description
Bug ID	BUG-02
Bug Title	API allows partial update of a non-existing product
Related Test Case ID	TC-08
API/Endpoint	/products/9999
Method	PATCH
Severity	High
Priority	High
Steps to Reproduce	1. Send a PATCH request to /products/9999 with updated title. 2. Observe the response.
Expected Result	The API should return 404 Not Found or an appropriate error indicating that the product does not exist.
Actual Result	The API returned 200 OK and accepted the partial update request for a non-existing product.
Status	Open

Bug Report 3:

Attribute	Description
Bug ID	BUG-03
Bug Title	API allows deleting a non-existing product
Related Test Case ID	TC-10
API/Endpoint	/products/9999
Method	DELETE
Severity	High
Priority	High
Steps to Reproduce	1. Send a DELETE request to /products/9999. 2. Observe the response.
Expected Result	The API should return 404 Not Found or an appropriate error message.
Actual Result	The API returned 200 OK with an empty response body.
Status	Open

Bug Report 4:

Attribute	Description
Bug ID	BUG-04
Bug Title	API allows product creation without the required title field
Related Test Case ID	TC-12
API/Endpoint	/products
Method	POST
Severity	High
Priority	High
Steps to Reproduce	1. Send a POST request without the title field. 2. Observe the response.
Expected Result	The API should reject the request and return a validation error indicating that the title field is required.
Actual Result	The API returned 201 Created and created the product without the title field.
Status	Open

Bug Report 5:

Attribute	Description
Bug ID	BUG-05
Bug Title	API allows creating a product with an empty title
Related Test Case ID	TC-13
API/Endpoint	/products
Method	POST
Severity	Medium
Priority	Medium
Steps to Reproduce	1. Send a POST request with an empty title value. 2. Observe the response.
Expected Result	The API should reject the request because the title field cannot be empty.
Actual Result	The API returned 201 Created and created the product with an empty title.
Status	Open

Bug Report 6:

Attribute	Description
Bug ID	BUG-06
Bug Title	API accepts invalid data type for price
Related Test Case ID	TC-14
API/Endpoint	/products
Method	POST
Severity	High
Priority	High
Steps to Reproduce	1. Send a POST request with "price":"abc". 2. Observe the response.
Expected Result	The API should reject the request because the price field must be numeric.
Actual Result	The API returned 201 Created and accepted the invalid value "abc" for the price field.
Status	Open

Bug Report 7:

Attribute	Description
Bug ID	BUG-07
Bug Title	API allows duplicate product creation
Related Test Case ID	TC-16
API/Endpoint	/products
Method	POST
Severity	Medium
Priority	Medium
Steps to Reproduce	1. Send a POST request using product details identical to an existing product. 2. Observe the response.
Expected Result	The API should prevent duplicate product creation or return an appropriate validation error.
Actual Result	The API returned 201 Created and created a duplicate product.
Status	Open

Bug Report 8:

Attribute	Description
Bug ID	BUG-08
Bug Title	API accepts zero price value
Related Test Case ID	TC-20
API/Endpoint	/products
Method	POST
Severity	Medium
Priority	Medium
Steps to Reproduce	1. Send a POST request with price set to 0. 2. Observe the response.
Expected Result	The API should reject products with a price of zero.
Actual Result	The API returned 201 Created and created the product with a price of 0.
Status	Open

Bug Report 9:

Attribute	Description
Bug ID	BUG-09
Bug Title	API accepts negative price value
Related Test Case ID	TC-21
API/Endpoint	/products
Method	POST
Severity	Medium
Priority	Medium
Steps to Reproduce	1. Send a POST request with price set to -10. 2. Observe the response.
Expected Result	The API should reject products with a negative price.
Actual Result	The API returned 201 Created and created the product with a negative price value.
Status	Open

Bug Report 10:

Attribute	Description
Bug ID	BUG-10
Bug Title	API accepts excessively large price value
Related Test Case ID	TC-22
API/Endpoint	/products
Method	POST
Severity	Low
Priority	Low
Steps to Reproduce	1. Send a POST request with a very large price value. 2. Observe the response.
Expected Result	The API should validate the maximum allowed price range and reject excessively large values.
Actual Result	The API returned 201 Created and created the product with a very large price value.
Status	Open

Bug Report 11:

Attribute	Description
Bug ID	BUG-11
Bug Title	API accepts excessively long product title
Related Test Case ID	TC-23
API/Endpoint	/products
Method	POST
Severity	Low
Priority	Low
Steps to Reproduce	1. Send a POST request with an excessively long title. 2. Observe the response.
Expected Result	The API should validate the maximum allowed title length and reject excessively long values.
Actual Result	The API returned 201 Created and created the product with an excessively long title.
Status	Open

Bug Report 12:

Attribute	Description
Bug ID	BUG-12
Bug Title	API allows product creation without the required price field
Related Test Case ID	TC-24
API/Endpoint	/products
Method	POST
Severity	High
Priority	High
Steps to Reproduce	1. Send a POST request without the price field. 2. Observe the response.
Expected Result	The API should reject the request and return a validation error indicating that the price field is required.
Actual Result	The API returned 201 Created and created the product without the price field.
Status	Open

Bug Report 13:

Attribute	Description
Bug ID	BUG-13
Bug Title	API does not return an appropriate error for an invalid product ID format
Related Test Case ID	TC-25
API/Endpoint	/products/abc
Method	GET
Severity	Medium
Priority	Medium
Steps to Reproduce	1. Send a GET request to /products/abc. 2. Observe the response.
Expected Result	The API should return 400 Bad Request or 404 Not Found with an appropriate error message.
Actual Result	The API returned 200 OK with an empty response body and no error message.
Status	Open

Bug Report 14:

Attribute	Description
Bug ID	BUG-14
Bug Title	API returns an inconsistent response when the Content-Type header is missing
Related Test Case ID	TC-27
API/Endpoint	/products
Method	POST
Severity	Medium
Priority	Medium
Steps to Reproduce	1. Remove the Content-Type: application/json header. 2. Send a POST request with valid product data. 3. Observe the response.
Expected Result	The API should reject the request with an appropriate error or process it consistently with the correct status code and response body.
Actual Result	The API returned 200 OK with only the generated product ID ({"id":21}), resulting in an inconsistent response.
Status	Open
