

HisabDo Internship Bootcamp

Software Quality Assurance (SQA) Track

Day 7 – Mini Test Project

(Manual Test Cases Report)

Submitted By:

Eshal Kamal

Internship Duration:

60-Day Internship Bootcamp

Organization:

HisabDo

Submission Date:

7th August, 2026

Test Case 1:

Scenario: Verify that a new user can successfully register with valid information.

Attribute	Description
Test Case ID	TC-01
Module	Registration
Preconditions	1. User is on the Registration page. 2. Internet connection is available. 3. The email address is not already registered.
Test Data	First Name: Test Last Name: User Username: testuserek Email Address: ek.sqa.testing@gmail.com Password: ***** Confirm Password: ***** Terms of Service & Privacy Policy: Accepted
Test Steps	1. Open the Registration page. 2. Enter a valid first name. 3. Enter a valid last name. 4. Enter a unique username. 5. Enter a valid email address. 6. Enter a password meeting all password requirements. 7. Re-enter the same password in the Confirm Password field. 8. Accept the Terms of Service and Privacy Policy. 9. Click the Create Account button.
Expected Result	The application should successfully create the user account and redirect the user to the email verification page to verify the registered email address.
Actual Result	The user account was created successfully and the application redirected to the email verification page where a verification code was required to activate the account.
Status	Pass

Test Case 2:

Scenario: Verify that the Create Account button remains disabled when all mandatory registration fields are left empty.

Attribute	Description
Test Case ID	TC-02
Module	Registration
Preconditions	User is on the Registration page.

Test Data	First Name: (Blank) Last Name: (Blank) Username: (Blank) Email Address: (Blank) Password: (Blank) Confirm Password: (Blank) Terms of Service & Privacy Policy: Not Accepted
Test Steps	1. Open the Registration page. 2. Leave all mandatory fields empty. 3. Do not accept the Terms of Service & Privacy Policy checkbox. 4. Observe the Create Account button.
Expected Result	The Create Account button should remain disabled, preventing the user from submitting the registration form until all mandatory fields are completed and the Terms of Service & Privacy Policy are accepted.
Actual Result	The Create Account button remained disabled, preventing form submission while mandatory fields were empty and the Terms of Service & Privacy Policy were not accepted.
Status	Pass

Test Case 3:

Scenario: Verify that registration fails when an invalid email address is provided.

Attribute	Description
Test Case ID	TC-03
Module	Registration
Preconditions	User is on the Registration page.
Test Data	First Name: Test Last Name: User Username: testuserinvalid Email Address: testuserinvalid.com Password: ***** Confirm Password: ***** Terms of Service & Privacy Policy: Accepted
Test Steps	1. Open the Registration page. 2. Enter valid information in all fields except Email. 3. Enter testuserinvalid.com as the email address. 4. Enter the same password in the Confirm Password field. 5. Accept the Terms of Service & Privacy Policy. 6. Observe the email field.
Expected Result	The application should display an email validation error and prevent registration.
Actual Result	The application displayed an email validation message indicating that @ is missing and prevented registration.
Status	Pass

Test Case 4:

Scenario: Verify that registration is not allowed using an already registered email address.

Attribute	Description
Test Case ID	TC-04
Module	Registration
Preconditions	1. User is on the Registration page. 2. The email address is already associated with an existing account.
Test Data	First Name: Test Last Name: User Username: testuserek1 Email Address: ek.sqa.testing@gmail.com Password: ***** Confirm Password: ***** Terms of Service & Privacy Policy: Accepted
Test Steps	1. Open the Registration page. 2. Enter valid information in all required fields. 3. Enter an already registered email address. 4. Enter the same password in the Confirm Password field. 5. Accept the Terms of Service and Privacy Policy. 6. Click the Create Account button.
Expected Result	The application should prevent registration and display a clear message indicating that the email address is already registered.
Actual Result	The application prevented registration and displayed the message "Email is already registered."
Status	Pass

Test Case 5:

Scenario: Verify the minimum password length requirement during registration.

Attribute	Description
Test Case ID	TC-05
Module	Registration
Preconditions	User is on the Registration page.
Test Data	First Name: Test Last Name: User Username: testuserlength Email Address: testuserlength@gmail.com Password: ***** Confirm Password: ***** Terms of Service & Privacy Policy: Accepted

Test Steps	1. Open the Registration page. 2. Enter valid information in all required fields. 3. Enter a 5-character password containing at least one uppercase letter, one number and one special character. 4. Enter the same password in the Confirm Password field. 5. Accept the Terms of Service and Privacy Policy. 6. Observe the Create Account button.
Expected Result	The application should reject the password because it contains fewer than 6 characters and the Create Account button should remain disabled.
Actual Result	The Create Account button remained disabled when a 5-character password was entered, even though the password contained an uppercase letter, number and special character.
Status	Pass

Test Case 6:

Scenario: Verify that registration fails when the password confirmation does not match the password.

Attribute	Description
Test Case ID	TC-06
Module	Registration
Preconditions	User is on the Registration page.
Test Data	First Name: Test Last Name: User Username: testuserconfirm Email Address: testuserconfirm@gmail.com Password: ***** Confirm Password: ***** Terms of Service & Privacy Policy: Accepted
Test Steps	1. Open the Registration page. 2. Enter valid information in all required fields. 3. Enter password in the Password field. 4. Enter a different password in the Confirm Password field. 5. Accept the Terms of Service and Privacy Policy. 6. Observe the Confirm Password field and Create Account button.
Expected Result	The application should display a password mismatch validation message and keep the Create Account button disabled.
Actual Result	The application displayed "Passwords do not match." and the Create Account button remained disabled.
Status	Pass

Test Case 7:

Scenario: Verify that the registration form prevents account creation when the Terms of Service and Privacy Policy are not accepted.

Attribute	Description
Test Case ID	TC-07
Module	Registration
Preconditions	User is on the Registration page.
Test Data	First Name: Test Last Name: User Username: testuserterms Email Address: testuserterms@gmail.com Password: ***** Confirm Password: ***** Terms of Service & Privacy Policy: Not Accepted
Test Steps	1. Open the Registration page. 2. Enter valid information in all required fields. 3. Enter the same password in the Confirm Password field. 4. Leave the Terms of Service and Privacy Policy checkbox unchecked. 5. Click the Create Account button.
Expected Result	The application should prevent account creation and display a validation message requiring the user to accept the Terms of Service and Privacy Policy.
Actual Result	The application prevented account creation and displayed the message "Please check this box if you want to proceed."
Status	Pass

Test Case 8:

Scenario: Verify that a registered user can successfully sign in with valid credentials.

Attribute	Description
Test Case ID	TC-08
Module	Login
Preconditions	1. User has a registered and verified Berryfy account. 2. User is on the Sign In page.
Test Data	Email Address: ek.sqa.testing@gmail.com Password: ***** Sign in as: User Remember me: Unchecked

Test Steps	1. Open the Sign In page. 2. Select the appropriate account role under Sign in as. 3. Enter the registered email address. 4. Enter the correct password. 5. Click the Sign In button.
Expected Result	The application should authenticate the user successfully and redirect the user to the appropriate page after successful sign in.
Actual Result	The user was successfully authenticated and signed in to the Berryfy application.
Status	Pass

Test Case 9:

Scenario: Verify that the login form prevents authentication when an incorrect password is provided.

Attribute	Description
Test Case ID	TC-09
Module	Login
Preconditions	1. A user account is already registered and verified. 2. User is on the Sign In page.
Test Data	Email Address: ek.sqa.testing@gmail.com Password: ***** Sign in as: User Remember me: Unchecked
Test Steps	1. Open the Sign In page. 2. Select User under Sign in as. 3. Enter the registered email address. 4. Enter an incorrect password. 5. Click the Sign In button.
Expected Result	The application should reject the login attempt and display an appropriate error message indicating that the email address or password is invalid.
Actual Result	The application rejected the login attempt and displayed the message "Invalid email or password."
Status	Pass

Test Case 10:

Scenario: Verify that the login form prevents authentication when an unregistered email address is provided.

Attribute	Description
Test Case ID	TC-10
Module	Login
Preconditions	1. User is on the Sign In page. 2. The email address used for testing is not registered in the application.
Test Data	Email Address: unregistereduser@gmail.com Password: ***** Sign in as: User Remember me: Unchecked
Test Steps	1. Open the Sign In page. 2. Select User under Sign in as. 3. Enter an unregistered email address. 4. Enter a valid-format password. 5. Click the Sign In button.
Expected Result	The application should reject the login attempt and display an appropriate error message indicating that the email address or password is invalid.
Actual Result	The application rejected the login attempt and displayed the message "Invalid email or password."
Status	Pass

Test Case 11:

Scenario: Verify that the login form validates the email address format when an invalid email address is entered.

Attribute	Description
Test Case ID	TC-11
Module	Login
Preconditions	User is on the Sign In page.
Test Data	Email Address: ek.sqa.testinggmail.com Password: ***** Sign in as: User Remember me: Unchecked
Test Steps	1. Open the Sign In page. 2. Select User under Sign in as. 3. Enter ek.sqa.testinggmail.com in the Email Address field.

	4. Enter the Correct Password. 5. Observe the email field and Sign In button.
Expected Result	The application should display an email validation message indicating that the @ symbol is required and prevent submission of the login form.
Actual Result	The application displayed the validation message indicating that @ is missing in the email address and prevented submission of the login form.
Status	Pass

Test Case 12:

Scenario: Verify that the login form prevents authentication when the email address field is left empty.

Attribute	Description
Test Case ID	TC-12
Module	Login
Preconditions	User is on the Sign In page.
Test Data	Email Address: (Blank) Password: ***** Sign in as: User Remember me: Unchecked
Test Steps	1. Open the Sign In page. 2. Select User under Sign in as. 3. Leave the Email Address field empty. 4. Enter a valid password. 5. Click the Sign In button.
Expected Result	The application should prevent the login attempt and display a validation message indicating that the Email Address field is required.
Actual Result	The application prevented the login attempt and displayed the validation message "Please fill out this field."
Status	Pass

Test Case 13:

Scenario: Verify that the login form prevents authentication when the password field is left empty.

Attribute	Description
Test Case ID	TC-13
Module	Login
Preconditions	User is on the Sign In page.
Test Data	Email Address: ek.sqa.testing@gmail.com Password: (Blank) Sign in as: User Remember me: Unchecked
Test Steps	1. Open the Sign In page. 2. Select User under Sign in as. 3. Enter the registered email address. 4. Leave the Password field empty. 5. Click the Sign In button.
Expected Result	The application should prevent the login attempt and display a validation message indicating that the Password field is required.
Actual Result	The application prevented the login attempt and displayed the validation message "Please fill out this field."
Status	Pass

Test Case 14:

Scenario: Verify that the Forgot Password link navigates the user to the password recovery page.

Attribute	Description
Test Case ID	TC-14
Module	Login
Preconditions	User is on the Sign In page.
Test Data	N/A
Test Steps	1. Open the Sign In page. 2. Locate the Forgot Password? link. 3. Click the Forgot Password? link.
Expected Result	The application should navigate the user to the password recovery page.
Actual Result	The application navigated the user to the password recovery page successfully.
Status	Pass

Test Case 15:

Scenario: Verify that the Sign Up link navigates the user from the Sign In page to the account registration page.

Attribute	Description
Test Case ID	TC-15
Module	Login
Preconditions	User is on the Sign In page.
Test Data	N/A
Test Steps	1. Open the Sign In page. 2. Locate the "Sign up here" link. 3. Click the "Sign up here" link.
Expected Result	The application should navigate the user to the Create Account registration page.
Actual Result	The application navigated the user to the Create Account registration page successfully.
Status	Pass

Test Case 16:

Scenario: Verify that a user can successfully add an in-stock product to the Shopping Cart.

Attribute	Description
Test Case ID	TC-16
Module	Shopping Cart
Preconditions	1. User is on the Products page. 2. The selected product is in stock.
Test Data	Product: Cola Soda (12-Pack Cans) SKU: WD-004 Price: \$6.99 Availability: In Stock
Test Steps	1. Open the Products page. 2. Locate Cola Soda (12-Pack Cans). 3. Open the product details. 4. Click the Add to Cart button. 5. Open the Shopping Cart. 6. Verify the added product and order summary.
Expected Result	The selected product should be successfully added to the Shopping Cart and the cart should display the correct product name, SKU, quantity, price, tax and order total.

Actual Result	Cola Soda (12-Pack Cans) was successfully added to the Shopping Cart. The cart displayed SKU WD-004, quantity 1, price \$6.99, tax \$0.70 and total \$7.69.
Status	Pass

Test Case 17:

Scenario: Verify that the Shopping Cart correctly updates the item quantity when the quantity is increased.

Attribute	Description
Test Case ID	TC-17
Module	Shopping Cart
Preconditions	1. Cola Soda is already added to the Shopping Cart. 2. The cart displays quantity 1.
Test Data	Product: Cola Soda (12-Pack Cans) Current Quantity: 1 Updated Quantity: 2 Maximum Available: 2
Test Steps	1. Open the Shopping Cart. 2. Locate Cola Soda. 3. Increase the quantity from 1 to 2. 4. Observe the updated product quantity and order summary.
Expected Result	The product quantity should increase to 2 and the item subtotal and order total should update accordingly.
Actual Result	The product quantity was successfully updated from 1 to 2. The updated quantity and recalculated order summary were displayed correctly.
Status	Pass

Test Case 18:

Scenario: Verify that the Shopping Cart correctly updates the item quantity when the quantity is decreased.

Attribute	Description
Test Case ID	TC-18
Module	Shopping Cart

Preconditions	1. Potato Chips (Classic Salted, Large Bag) is already added to the Shopping Cart. 2. The cart displays quantity 2.
Test Data	Product: Potato Chips (Classic Salted, Large Bag) Current Quantity: 2 Updated Quantity: 1 Maximum Available: 8
Test Steps	1. Open the Shopping Cart. 2. Locate Potato Chips (Classic Salted, Large Bag). 3. Decrease the quantity from 2 to 1. 4. Observe the updated product quantity and order summary.
Expected Result	The product quantity should decrease to 1, and the item subtotal and order total should update accordingly.
Actual Result	The product quantity was successfully decreased from 2 to 1. The item subtotal was updated from \$6.98 to \$3.49 and the order summary was recalculated correctly.
Status	Pass

Test Case 19:

Scenario: Verify that the Shopping Cart prevents increasing the product quantity beyond the available stock limit.

Attribute	Description
Test Case ID	TC-19
Module	Shopping Cart
Preconditions	1. Potato Chips (Classic Salted, Large Bag) is already added to the Shopping Cart. 2. The cart displays the maximum available quantity.
Test Data	Product: Potato Chips (Classic Salted, Large Bag) Current Quantity: 5 Maximum Available: 5
Test Steps	1. Open the Shopping Cart. 2. Locate Potato Chips (Classic Salted, Large Bag). 3. Click the increase quantity button after reaching the maximum available limit. 4. Observe the product quantity and system response.
Expected Result	The system should prevent increasing the quantity beyond 5 and should display a validation message or disable the increase option.
Actual Result	The product quantity remained at 5 after attempting to increase it further. The system did not allow adding more items than the available stock limit.
Status	Pass

Test Case 20:

Scenario: Verify that the Shopping Cart allows users to remove a product successfully.

Attribute	Description
Test Case ID	TC-20
Module	Shopping Cart
Preconditions	1. Potato Chips (Classic Salted, Large Bag) is already added to the Shopping Cart. 2. The product is visible in the cart.
Test Data	Product: Potato Chips (Classic Salted, Large Bag) Quantity: 5 Price: \$3.49
Test Steps	1. Open the Shopping Cart. 2. Locate Potato Chips (Classic Salted, Large Bag). 3. Click the Remove/Delete option for the product. 4. Observe the cart contents and order summary.
Expected Result	The selected product should be removed from the Shopping Cart and the item count, subtotal, tax and total amount should update accordingly.
Actual Result	The product was successfully removed from the Shopping Cart. The cart item count and order summary were updated after removal.
Status	Pass

Test Case 21:

Scenario: Verify that users can search for a product by entering its name.

Attribute	Description
Test Case ID	TC-21
Module	Product Search
Preconditions	1. User is on the product listing page. 2. Search functionality is available.
Test Data	Search Keyword: Potato Chips
Test Steps	1. Open the product search bar. 2. Enter Potato Chips as the search keyword. 3. Click the Search button. 4. Observe the displayed results.
Expected Result	The system should display products matching the entered keyword, including Potato Chips (SKU: SN-001).
Actual Result	The product Potato Chips (SKU: SN-001) was displayed successfully in the search results.
Status	Pass

Test Case 22:

Scenario: Verify that users can filter products by selecting a category.

Attribute	Description
Test Case ID	TC-22
Module	Product Category
Preconditions	1. User is on the product listing page. 2. Product categories are available.
Test Data	Category: Snack
Test Steps	1. Open the category section. 2. Select the Snack category. 3. Observe the displayed products.
Expected Result	The system should display only products belonging to the selected category, including Snack items such as Potato Chips, Granola Bars, Mixed Nuts and Pretzel Twists.
Actual Result	Products under the selected Snack category were displayed successfully.
Status	Pass

Test Case 23:

Scenario: Verify that the system displays appropriate results when searching for a non-existing product.

Attribute	Description
Test Case ID	TC-23
Module	Product Search
Preconditions	1. User is on the product listing page. 2. Search functionality is available.
Test Data	Search Keyword: Chocolate Cookies
Test Steps	1. Open the search bar. 2. Enter Chocolate Cookies as the search keyword. 3. Click the Search button. 4. Observe the displayed results.
Expected Result	The system should display a message indicating that no products were found for the entered search keyword.
Actual Result	No matching product was found and the system displayed an empty result/no product found message.
Status	Pass

Test Case 24:

Scenario: Verify that the product search works correctly when a partial product name is entered.

Attribute	Description
Test Case ID	TC-24
Module	Product Search
Preconditions	1. User is on the product listing page. 2. Search functionality is available.
Test Data	Search Keyword: Pot
Test Steps	1. Open the search bar. 2. Enter Pot as a partial product name. 3. Click the Search button. 4. Observe the displayed search results.
Expected Result	The system should display relevant products matching the entered partial keyword, including Potato Chips (SKU: SN-001).
Actual Result	The product Potato Chips (SKU: SN-001) was displayed successfully when searching with the partial keyword Pot.
Status	Pass

Test Case 25:

Scenario: Verify that the product list updates correctly when sorting products by price.

Attribute	Description
Test Case ID	TC-25
Module	Product Listing
Preconditions	1. User is on the product listing page. 2. Multiple products with different prices are available.
Test Data	Sort Option: Price (Low to High)
Test Steps	1. Open the product listing page. 2. Select the price sorting option. 3. Choose Low to High sorting. 4. Observe the displayed product order.
Expected Result	Products should be displayed in ascending order according to their prices.
Actual Result	Products were displayed according to the selected price sorting option.
Status	Pass

Test Case 26:

Scenario: Verify that the system displays order confirmation details after successful payment.

Attribute	Description
Test Case ID	TC-26
Module	Order Confirmation
Preconditions	1. Product is added to the Shopping Cart. 2. User completes the checkout process. 3. Payment is successfully processed.
Test Data	Order Status: Successful Payment Payment Result: Processed Successfully
Test Steps	1. Add product(s) to the Shopping Cart. 2. Proceed to checkout. 3. Complete the payment process. 4. Observe the order confirmation page.
Expected Result	The system should display a successful purchase confirmation message along with the next steps, including confirmation email, order processing and shipping updates.
Actual Result	The system displayed "Thank you for purchasing! Your payment has been processed successfully" along with information about confirmation email, order processing and shipping updates.
Status	Pass

Test Case 27:

Scenario: Verify that the placed order is displayed correctly in the My Orders section.

Attribute	Description
Test Case ID	TC-27
Module	My Orders
Preconditions	1. User has successfully completed checkout. 2. Order has been placed successfully.
Test Data	Products: Potato Chips (Classic Salted, Large Bag) – Quantity: 1 × \$3.49 Mixed Nuts (Unsalted, 16oz) – Quantity: 1 × \$8.99 Subtotal: \$12.48 Shipping: \$10.00 Tax: \$1.25 Total Amount: \$23.73 Payment Status: Paid
Test Steps	1. Navigate to the My Orders section. 2. Open the latest placed order.

	3. Verify the order ID, products, quantities, payment status and total amount.
Expected Result	The system should display the complete order details including ordered products, quantities, subtotal, shipping charges, tax, total amount and payment status.
Actual Result	The order was displayed successfully with correct products, quantities, subtotal, shipping charges, tax, total amount (\$23.73) and payment status (Paid).
Status	Pass
