

HisabDo Internship Bootcamp

Software Quality Assurance (SQA) Track

Day 2 – QA Test Document

Submitted By:

Eshal Kamal

Internship Duration:

60-Day Internship Bootcamp

Organization:

HisabDo

Testing Type:

Manual Testing

Functional Testing

Positive Testing

Negative Testing

Boundary Value Testing

Submission Date:

2nd August 2026

Test Scenarios & Test Cases (Positive, Negative, Boundary Value)

Test Case 1:

Test Case ID	TC-01			
Module	Registration			
Test Scenario	Verify user can register with valid information.			
S#	Precondition		S#	Test Data
1	User is on Registration page.		1	Name: Test User
2	Internet connection is available.		2	Email: testuser@gmail.com
3	User account does not already exist.		3	Password: Password123
S#	Test Steps			
1	Open the Registration page.			
2	Enter valid name, email and password.			
3	Click the Register button.			
Expected Result	User account should be created and redirects to the Home page.			
Actual Result	User account is created successfully and redirected to the Home page.			
Status (Pass/Fail)	Pass			

Test Case 2:

Test Case ID	TC-02			
Module	Registration			
Test Scenario	Verify registration with an invalid email address.			
S#	Precondition		S#	Test Data
1	User is on Registration page.		1	Name: Test User
2	Internet connection is available.		2	Email: testusergmail.com
3	User account does not already exist.		3	Password: Password123
S#	Test Steps			
1	Open Registration page.			
2	Enter an invalid email address.			
3	Enter other valid details.			
4	Click Register.			

Expected Result	Registration should fail and an "Invalid Email Address" validation message should appear.
Actual Result	Validation message is displayed and registration is not completed.
Status (Pass/Fail)	Pass

Test Case 3:

Test Case ID	TC-03			
Module	Registration			
Test Scenario	Verify registration with password less than 8 characters.			
S#	Precondition		S#	Test Data
1	User is on Registration page.		1	Name: Test User
2	Internet connection is available.		2	Email: testuser@gmail.com
3	User account does not already exist.		3	Password: Pass123
S#	Test Steps			
1	Open Registration page.			
2	Enter valid name and email.			
3	Enter a 7-character password.			
4	Click Register.			
Expected Result	Registration should fail and a validation message stating "Password must contain at least 8 characters." should appear.			
Actual Result	Validation message appears and registration is not successful.			
Status (Pass/Fail)	Pass			

Test Case 4:

Test Case ID	TC-04			
Module	Registration			
Test Scenario	Verify registration with exactly 8-character password.			
S#	Precondition		S#	Test Data
1	User is on Registration page.		1	Name: Test User
2	Internet connection is available.		2	Email: testuser@gmail.com
3	User account does not already exist.		3	Password: Pass1234
S#	Test Steps			
1	Open Registration page.			

2	Enter valid name and email.
3	Enter a 7-character password.
4	Click Register.
Expected Result	Registration should be successful.
Actual Result	Registration is completed successfully.
Status (Pass/Fail)	Pass

Test Case 5:

Test Case ID	TC-05			
Module	Registration			
Test Scenario	Verify registration with 9-character password.			
S#	Precondition		S#	Test Data
1	User is on Registration page.		1	Name: Test User
2	Internet connection is available.		2	Email: testuser@gmail.com
3	User account does not already exist.		3	Password: Pass12345
S#	Test Steps			
1	Open Registration page.			
2	Enter valid name and email.			
3	Enter a 9-character password.			
4	Click Register.			
Expected Result	Registration should be successful.			
Actual Result	Registration is completed successfully.			
Status (Pass/Fail)	Pass			

Test Case 6:

Test Case 6:

Test Case ID	TC-06			
Module	Registration			
Test Scenario	Verify registration with empty required fields.			
S#	Precondition		S#	Test Data
1	User is on Registration page.		1	Name: (empty)
2	Internet connection is available.		2	Email: (empty)
			3	Password: (empty)

S#	Test Steps
1	Open Registration page.
2	Leave all required fields empty.
3	Click Register.
4	Observe validation messages.
Expected Result	Registration should not proceed and validation messages should appear for all required fields.
Actual Result	Validation messages are displayed and registration is prevented.
Status (Pass/Fail)	Pass

Test Case 7:

Test Case ID					TC-07					
Module					Login					
Test Scenario					Verify login using valid email and password.					
S#		Precondition					S#		Test Data	
1		User account already exists.					1		Email: testuser@gmail.com	
2		User is on Login page.					2		Password: Password123	
3		Internet connection is available.					3			
S#		Test Steps								
1		Open Login page.								
2		Enter valid email.								
3		Enter valid password.								
4		Click Login.								
Expected Result		User should successfully log in and be redirected to the Home/Dashboard page.								
Actual Result		User is logged in successfully.								
Status (Pass/Fail)		Pass								

Test Case 8:

Test Case 01				
Test Case ID	TC-8			
Module	Login			
Test Scenario	Verify login with invalid password.			
S#	Precondition		S#	Test Data
1	User account already exists.		1	Email: testuser@gmail.com
2	User is on Login page.		2	Password: Wrong123
3	Internet connection is available.			

S#	Test Steps
1	Open Login page.
2	Enter valid email.
3	Enter invalid password.
4	Click Login.
Expected Result	Login should fail and display "Invalid email or password."
Actual Result	Error message is displayed and login is failed.
Status (Pass/Fail)	Pass

Test Case 9:

Test Case ID	TC-09			
Module	Login			
Test Scenario	Verify login with empty email field.			
S#	Precondition		S#	Test Data
1	User account already exists.		1	Email: (empty)
2	User is on Login page.		2	Password: Password123
3	Internet connection is available.			
S#	Test Steps			
1	Open Login page.			
2	Leave email field empty.			
3	Enter valid password.			
4	Click Login.			
Expected Result	Login should not proceed and an "Email is required" validation message should appear.			
Actual Result	Validation message is displayed and login is failed.			
Status (Pass/Fail)	Pass			

Test Case 10:

Test Case ID	TC-10			
Module	Login			
Test Scenario	Verify login with empty password field.			
S#	Precondition		S#	Test Data
1	User account already exists.		1	Email: testuser@gmail.com
2	User is on Login page.		2	Password: (empty)

3	Internet connection is available.			
S#	Test Steps			
1	Open Login page.			
2	Enter valid email.			
3	Leave password field empty.			
4	Click Login.			
Expected Result	Login should not proceed and a "Password is required" validation message should appear.			
Actual Result	Validation message is displayed and login is failed.			
Status (Pass/Fail)	Pass			

Test Case 11:

Test Case 11:

Test Case ID	TC-11			
Module	Product Search			
Test Scenario	Verify user can search for an existing product.			
S#	Precondition		S#	Test Data
1	User is on the Home page.		1	Search Keyword: Laptop
2	Product catalog is available.			
3	Internet connection is available.			
S#	Test Steps			
1	Click on the search bar.			
2	Enter "Laptop".			
3	Click the Search button or press Enter.			
4	Observe the search results.			
Expected Result	Relevant products matching the keyword should be displayed.			
Actual Result	Relevant products are displayed successfully.			
Status (Pass/Fail)	Pass			

Test Case 12:

Test Case 12:				
Test Case ID	TC-12			
Module	Product Search			
Test Scenario	Verify search with a non-existing product.			
S#	Precondition		S#	Test Data
1	User is on the Home page.		1	Search Keyword: XYZ123

2	Product catalog is available.		
3	Internet connection is available.		
S#	Test Steps		
1	Open the search bar.		
2	Enter "XYZ123".		
3	Click Search.		
4	Observe the result.		
Expected Result	A message such as "No products found" should be displayed.		
Actual Result	"No products found" message is displayed.		
Status (Pass/Fail)	Pass		

Test Case 13:

Test Case ID

Test Case ID	TC-13			
Module	Product			
Test Scenario	Verify user can view product details.			
S#	Precondition		S#	Test Data
1	User is on the product listing page.		1	Product: Laptop
2	Product exists.			
3	Internet connection is available.			
S#	Test Steps			
1	Navigate to the product listing page.			
2	Select a product.			
3	Click on the product.			
4	Observe the product details page.			
Expected Result	Product details (name, price, description and image) should be displayed correctly.			
Actual Result	Product details are displayed successfully.			
Status (Pass/Fail)	Pass			

Test Case 14:

Test Case ID		TC-14
Module		Shopping Cart
Test Scenario		Verify user can add a product to the cart.

S#	Precondition	S#	Test Data
1	User is logged in.	1	Product: Laptop
2	Product is available.	2	Quantity: 1
3	User is on the product page.		
S#	Test Steps		
1	Open the product page.		
2	Click Add to Cart.		
3	Open the shopping cart.		
4	Verify the product is listed.		
Expected Result	Selected product should be added to the shopping cart successfully.		
Actual Result	Product is added successfully.		
Status (Pass/Fail)	Pass		

Test Case 15:

Test Case ID	TC-15		
Module	Shopping Cart		
Test Scenario	Verify increasing product quantity updates the cart total.		
S#	Precondition	S#	Test Data
1	User is logged in.	1	Product: Laptop
2	Product is already in the cart.	2	Quantity: Increase from 1 to 2
3	User is on the Cart page.		
S#	Test Steps		
1	Open the Cart page.		
2	Click the "+" button.		
3	Increase quantity from 1 to 2.		
4	Observe the updated total.		
Expected Result	Product quantity increases and the cart total should update correctly.		
Actual Result	Quantity and total are updated correctly.		
Status (Pass/Fail)	Pass		

Test Case 16:

Test Case ID	TC-16		
Module	Shopping Cart		
Test Scenario	Verify decreasing product quantity updates the cart total.		
S#	Precondition	S#	Test Data

1	User is logged in.		1	Product: Laptop
2	Product quantity is greater than 1.		2	Quantity: Decrease from 2 to 1
3	User is on the Cart page.			
S#	Test Steps			
1	Open the Cart page.			
2	Click the "-" button.			
3	Reduce quantity from 2 to 1.			
4	Verify the updated total.			
Expected Result	Product quantity decreases and the cart total should update correctly.			
Actual Result	Quantity and total are updated correctly.			
Status (Pass/Fail)	Pass			

Test Case 17:

Test Case 17:

Test Case ID	TC-17			
Module	Shopping Cart			
Test Scenario	Verify user can remove a product from the cart.			
S#	Precondition		S#	Test Data
1	User is logged in.		1	Product: Laptop
2	Product is available in the cart.		2	Remove selected product
3	User is on the Cart page.		3	
S#	Test Steps			
1	Open the Cart page.			
2	Click the Remove button.			
3	Confirm the removal if prompted.			
4	Observe the cart contents.			
Expected Result	The selected product should be removed and the cart total should update.			
Actual Result	Product is removed successfully and the total is updated.			
Status (Pass/Fail)	Pass			

Test Case 18:

Test Case ID	TC-18
Module	Checkout
Test Scenario	Verify successful checkout with valid delivery information.

S#	Precondition	S#	Test Data
1	User is logged in.	1	Name: Test User
2	At least one product is in the cart.	2	Address: 123 Main Street
3	User is on the Checkout page.	3	Payment Method: Credit Card
S#	Test Steps		
1	Open the Checkout page.		
2	Enter valid delivery information.		
3	Select a payment method.		
4	Click Place Order.		
Expected Result	Order should be placed successfully and an order confirmation message should display.		
Actual Result	Order is placed successfully and confirmation is displayed.		
Status (Pass/Fail)	Pass		

Test Case 19:

Test Case ID	TC-19		
Module	Checkout		
Test Scenario	Verify checkout with missing delivery information.		
S#	Precondition	S#	Test Data
1	User is logged in.	1	Name: Test User
2	Product is available in the cart.	2	Address: (empty)
3	User is on the Checkout page.	3	Payment Method: Credit Card
S#	Test Steps		
1	Open the Checkout page.		
2	Leave the delivery address empty.		
3	Select a payment method.		
4	Click Place Order.		
Expected Result	Order should not be placed and a validation message should indicate that the delivery address is required.		
Actual Result	Validation message is displayed and the order is not placed.		
Status (Pass/Fail)	Pass		

Test Case 20:

Test Case ID	TC-20		
Module	Checkout		
Test Scenario	Verify checkout without selecting a payment method.		

S#	Precondition		S#	Test Data
1	User is logged in.		1	Name: Test User
2	Product is available in the cart.		2	Address: 123 Main Street
3	User is on the Checkout page.		3	Payment Method: (Not Selected)
S#	Test Steps			
1	Open the Checkout page.			
2	Enter valid delivery information.			
3	Do not select any payment method.			
4	Click Place Order.			
Expected Result	The order should not be placed and the system should display a validation message requiring the user to select a payment method.			
Actual Result	Validation message is displayed and the order is not placed.			
Status (Pass/Fail)	Pass			

Bug Reports (Hypothetical)

Bug Report 1:

Bug ID	BUG_01
Bug Title	User can log in with an incorrect password.
Module	Login
S#	Steps to Reproduce
1	Open the Login page.
2	Enter a registered email address (testuser@gmail.com).
3	Enter an incorrect password (WrongPass123).
4	Click the Login button.
Expected Result	The system should reject the login attempt and display an "Invalid email or password" message.
Actual Result	The user is successfully logged in despite entering an incorrect password.
Severity	Critical
Priority	High

Bug Report 2:

Bug ID	BUG_02
Bug Title	Registration accepts an invalid email address.
Module	Registration
S#	Steps to Reproduce
1	Open the Registration page.
2	Enter valid name and password.
3	Enter an invalid email (testuser.com).
4	Click the Register button.
Expected Result	The system should display an "Invalid Email Address" validation message and prevent registration.
Actual Result	The account is created successfully using an invalid email address.
Severity	High
Priority	High

Bug Report 3:

Bug ID	BUG_03
Bug Title	Cart total does not update after increasing product quantity.
Module	Shopping Cart
S#	Steps to Reproduce

1	Login to the application.
2	Add a product to the shopping cart.
3	Open the Cart page.
4	Increase the product quantity from 1 to 2.
5	Observe the cart total.
6	Compare the total with the expected amount.
Expected Result	The cart total should update automatically according to the new quantity.
Actual Result	The quantity changes but the cart total remains unchanged.
Severity	High
Priority	High

Bug Report 4:

Bug ID	BUG_04
Bug Title	Order is placed without entering the delivery address.
Module	Checkout
S#	Steps to Reproduce
1	Login to the application.
2	Add a product to the shopping cart.
3	Open the Checkout page.
4	Leave the delivery address field empty.
5	Select a payment method.
6	Click the Place Order button.
Expected Result	The system should display a validation message and should not place the order.
Actual Result	The order is placed successfully even though the delivery address is missing.
Severity	Critical
Priority	High

Bug Report 5:

Bug ID	BUG_05
Bug Title	Search displays unrelated products.
Module	Product Search
S#	Steps to Reproduce
1	Open the Home page.
2	Click on the search bar.
3	Enter the keyword Laptop.
4	Click the Search button.
5	Observe the displayed products.
6	Compare the results with the entered keyword.
Expected Result	Only products related to Laptop should be displayed.

Actual Result	The search results include unrelated products that do not match the entered keyword.
Severity	Medium
Priority	Medium
