

HisabDo Internship Bootcamp

Software Quality Assurance (SQA) Track

Day 3 – Manual Testing of an E-Commerce Website

Submitted By:

Eshal Kamal

Internship Duration:

60-Day Internship Bootcamp

Organization:

HisabDo

Testing Type:

Manual Testing

Submission Date:

3rd August 2026

Website Tested:

Demo Web Shop (<https://demowebshop.tricentis.com>)

Positive Test Cases:

Test Case 1:

Test Case ID	TC-01			
Module	Homepage			
Test Scenario	Verify that the homepage loads successfully.			
S#	Precondition		S#	Test Data
1	User has a stable internet connection.		1	URL: https://demowebshop.tricentis.com
2	A supported web browser is installed.			
3	User knows the website URL.			
S#	Test Steps			
1	Launch the web browser.			
2	Enter the website URL in the address bar.			
3	Press Enter.			
4	Wait until the homepage finishes loading.			
Expected Result	The homepage should load successfully and display the logo, navigation menu, search bar, categories, featured products and footer without any errors.			
Actual Result	Homepage loaded successfully with all required elements displayed.			
Status (Pass/Fail)	Pass			

Test Case 2:

Test Case ID	TC-02			
Module	Homepage			
Test Scenario	Verify that navigation menu links work correctly.			
S#	Precondition		S#	Test Data
1	Homepage is open.		1	Navigation Menu
2	Internet connection is available.			
S#	Test Steps			
1	Open the homepage.			
2	Click Books.			

3	Verify Books page opens.
4	Return to homepage.
5	Click Computers.
6	Verify Computers page opens.
Expected Result	Each navigation menu should redirect the user to its respective page.
Actual Result	All selected navigation links opened their respective pages successfully.
Status (Pass/Fail)	Pass

Test Case 3:

Test Case ID	TC-03			
Module	Homepage			
Test Scenario	Verify search functionality using a valid product name.			
S#	Precondition		S#	Test Data
1	Homepage is open.		1	Laptop
2	Internet connection is available.			
S#	Test Steps			
1	Click inside the search box.			
2	Type Laptop.			
3	Click the Search button.			
Expected Result	Products related to the search keyword should be displayed.			
Actual Result	Relevant products were displayed successfully.			
Status (Pass/Fail)	Pass			

Test Case 4:

Test Case ID

Test Case ID	TC-04			
Module	Homepage			
Test Scenario	Verify all category links are clickable.			
S#	Precondition		S#	Test Data
1	Homepage is open.		1	Books
2	Internet connection is available.		2	Computers
			3	Electronics
S#	Test Steps			
1	Open homepage.			

2	Click Books category.
3	Return to homepage.
4	Click Computers category.
5	Return to homepage.
6	Click Electronics category.
Expected Result	Each category should redirect to its respective product listing page.
Actual Result	All category links worked correctly.
Status (Pass/Fail)	Pass

Test Case 5:

Test Case 5:

Test Case ID	TC-05			
Module	Homepage			
Test Scenario	Verify all homepage buttons are functional.			
S#	Precondition		S#	Test Data
1	Homepage is open.		1	Search Button
2	Internet connection is available.			
S#	Test Steps			
1	Enter a product keyword.			
2	Click Search.			
3	Observe the response.			
Expected Result	The button should perform the intended action without errors.			
Actual Result	Search button worked successfully.			
Status (Pass/Fail)	Pass			

Test Case 6:

Test Case 01				
Test Case ID	TC-06			
Module	Product			
Test Scenario	Verify product details are displayed correctly.			
S#	Precondition		S#	Test Data
1	Homepage is open.		1	Build your own computer
2	Internet connection is available.			
S#	Test Steps			
1	Navigate to Computers category.			

2	Open Build your own computer.
3	Observe the product page.
Expected Result	Product title, description, price, availability and Add to Cart button should be displayed correctly.
Actual Result	All product information displayed correctly.
Status (Pass/Fail)	Pass

Test Case 7:

Test Case ID	TC-07			
Module	Product			
Test Scenario	Verify product images load properly.			
S#	Precondition		S#	Test Data
1	User is on a product page.		1	Any available product.
2	Internet connection is available.			
S#	Test Steps			
1	Open any product.			
2	Observe the product image.			
3	Click the image if zoom is available.			
Expected Result	Images should load clearly without distortion or broken links.			
Actual Result	Product images loaded successfully.			
Status (Pass/Fail)	Pass			

Test Case 8:

Test Case ID	TC-08			
Module	Product			
Test Scenario	Verify product price is displayed correctly.			
S#	Precondition		S#	Test Data
1	User is viewing a product.		1	Any product
S#	Test Steps			
1	Open a product page.			
2	Locate the product price.			
Expected Result	The product price should be clearly visible and properly formatted.			
Actual Result	Product price displayed correctly.			

Status (Pass/Fail)	Pass
-------------------------------	------

Test Case 9:

Test Case ID	TC-09			
Module	Product			
Test Scenario	Verify product can be added to the shopping cart.			
S#	Precondition		S#	Test Data
1	User is on a product page.		1	Build your own computer
2	Product is available.			
S#	Test Steps			
1	Open the product page.			
2	Click Add to Cart.			
3	Open the Shopping Cart.			
Expected Result	Selected product should appear in the shopping cart with the correct quantity and price.			
Actual Result	Product added successfully.			
Status (Pass/Fail)	Pass			

Test Case 10:

Test Case ID	TC-10			
Module	Cart			
Test Scenario	Verify shopping cart updates after changing product quantity.			
S#	Precondition		S#	Test Data
1	At least one product is present in the shopping cart.		1	Quantity = 2
S#	Test Steps			
1	Open the Shopping Cart.			
2	Change the product quantity from 1 to 2.			
3	Click Update Shopping Cart.			
4	Observe the updated quantity and total price.			
Expected Result	The cart should update the product quantity and recalculate the total price correctly.			
Actual Result	Quantity and total price updated successfully.			
Status (Pass/Fail)	Pass			

Negative Test Cases:

Test Case 11:

Test Case ID	TC-11			
Module	Homepage (Search)			
Test Scenario	Verify search functionality with an invalid product name.			
	Preconditions			
S#	Precondition		S#	Test Data
1	User is on the homepage.		1	Search Keyword: xyz123abc
2	Internet connection is available.			
S#	Test Steps			
1	Open the homepage.			
2	Enter xyz123abc in the search box.			
3	Click the Search button.			
Expected Result	The system should display a message indicating that no products were found.			
Actual Result	No matching products were found and an appropriate message was displayed.			
Status (Pass/Fail)	Pass			

Test Case 12:

Test Case ID	TC-12			
Module	Homepage (Search)			
Test Scenario	Verify search functionality with an empty search field.			
S#	Precondition		S#	Test Data
1	User is on the homepage.		1	Blank Search Field
S#	Test Steps			
1	Open the homepage.			
2	Leave the search box empty.			
3	Click the Search button.			
Expected Result	The application should not crash and should handle the empty search appropriately with a validation message.			
Actual Result	The application handled the empty search without any errors.			
Status (Pass/Fail)	Pass			

Test Case 13:

Test Case ID	TC-13			
Module	Registration			
Test Scenario	Verify registration with an already registered email address.			
S#	Precondition		S#	Test Data
1	User is on the Registration page.		1	Email: testuser@gmail.com
2	The email address is already registered.			
S#	Test Steps			
1	Open the Registration page.			
2	Enter all other valid required details.			
3	Enter an already registered email address.			
4	Click the Register button.			
Expected Result	The system should prevent registration and display an appropriate error message.			
Actual Result	Registration was blocked and an error message was displayed.			
Status (Pass/Fail)	Pass			

Test Case 14:

Test Case ID	TC-14			
Module	Registration			
Test Scenario	Verify registration with an invalid email format.			
S#	Precondition		S#	Test Data
1	User is on the Registration page.		1	Email: testuser@
S#	Test Steps			
1	Open the Registration page.			
2	Enter the required details.			
3	Enter an invalid email address.			
4	Click Register.			
Expected Result	The system should display an email validation error and prevent registration.			
Actual Result	Email validation message was displayed.			
Status (Pass/Fail)	Pass			

Test Case 15:

Test Case ID	TC-15			
Module	Registration			
Test Scenario	Verify registration with all required fields left blank.			
S#	Precondition		S#	Test Data
1	User is on the Registration page.		1	All fields left blank
S#	Test Steps			
1	Open the Registration page.			
2	Leave all required fields empty.			
3	Click the Register button.			
Expected Result	The system should display validation messages for all mandatory fields.			
Actual Result	Required field validation messages were displayed.			
Status (Pass/Fail)	Pass			

Test Case 16:

Test Case ID	TC-16			
Module	Login			
Test Scenario	Verify login with an incorrect password.			
S#	Precondition		S#	Test Data
1	User account already exists.		1	Email:testuser@gmail.com
2	User is on the Login page.		2	Password: 123456
S#	Test Steps			
1	Open the Login page.			
2	Enter a valid email address.			
3	Enter an incorrect password.			
4	Click the Log in button.			
Expected Result	The system should deny access and display an appropriate error message.			
Actual Result	Login failed and an error message was displayed.			
Status (Pass/Fail)	Pass			

Test Case 17:

Test Case ID	TC-17			
Module	Login			

Test Scenario	Verify login with an unregistered email address.			
S#	Precondition		S#	Test Data
1	User is on the Login page.		1	Email: user@gmail.com
			2	Password: Pass1234
S#	Test Steps			
1	Open the Login page.			
2	Enter an unregistered email address.			
3	Enter a valid password.			
4	Click Log in.			
Expected Result	The system should not allow login and should display an appropriate error message.			
Actual Result	Login failed and an error message was displayed.			
Status (Pass/Fail)	Pass			

Test Case 18:

Test Case ID	TC-18			
Module	Registration			
Test Scenario	Verify registration with mismatched Password and Confirm Password.			
S#	Precondition		S#	Test Data
1	User is on the Registration page.		1	Password: Password123
			2	Confirm Password: Password321
S#	Test Steps			
1	Open the Registration page.			
2	Enter all valid required fields.			
3	Enter Password123 in the Password field.			
4	Enter Password321 in the Confirm Password field.			
5	Click the Register button.			
Expected Result	The system should not create the account and should display a validation message indicating that the password and confirm password do not match.			
Actual Result	The registration was prevented, and the message "The password and confirmation password do not match." was displayed.			
Status (Pass/Fail)	Pass			

Test Case 19:

Test Case ID	TC-19			
Module	Login			
Test Scenario	Verify login with both Email and Password fields left blank.			
S#	Precondition		S#	Test Data
1	User is on the Login page.		1	Email: Blank
			2	Password: Blank
S#	Test Steps			
1	Open the Login page.			
2	Leave both the Email and Password fields empty.			
3	Click the Log in button.			
Expected Result	The system should not allow login and should display validation messages indicating that the required fields are missing.			
Actual Result	The system prevented login and displayed the appropriate validation messages.			
Status (Pass/Fail)	Pass			

Test Case 20:

Test Case ID	TC-20			
Module	Cart			
Test Scenario	Verify adding an out-of-stock product to the shopping cart.			
S#	Precondition		S#	Test Data
1	User is on the product details page of an out-of-stock product.		1	Any product marked as Out of Stock (if available)
S#	Test Steps			
1	Open an out-of-stock product.			
2	Click the Add to Cart button.			
Expected Result	The system should prevent the product from being added to the cart and display an appropriate message indicating that the product is unavailable.			
Actual Result	The product was not added to the cart, and an appropriate availability message was displayed.			
Status (Pass/Fail)	Pass			

Boundary Value Test Cases:

Test Case 21:

Test Case ID	TC-21			
Module	Registration			
Test Scenario	Verify registration with the minimum valid password length (6 characters).			
S#	Precondition		S#	Test Data
1	User is on the Registration page.		1	Gender: Female
2	Internet connection is available.		2	First Name: Test
3	Email address is not already registered.		3	Last Name: User
			4	Email: testuser1@gmail.com
			5	Password: 123456
			6	Confirm Password: 123456
S#	Test Steps			
1	Open the Registration page.			
2	Select gender.			
3	Enter the first name and last name.			
4	Enter a valid email address.			
5	Enter 123456 in the Password field.			
6	Enter 123456 in the Confirm Password field.			
7	Click the Register button.			
Expected Result	The system should successfully create the account because the password meets the minimum required length of 6 characters.			
Actual Result	The account was created successfully.			
Status (Pass/Fail)	Pass			

Test Case 22:

Test Case ID	TC-22			
Module	Registration			
Test Scenario	Verify registration with a password shorter than the minimum required length (5 characters).			
S#	Precondition		S#	Test Data
1	User is on the Registration page.		1	Gender: Female
			2	First Name: Test
			3	Last Name: User

			4	Email: testuser2@gmail.com
			5	Password: 12345
			6	Confirm Password: 12345
S#	Test Steps			
1	Open the Registration page.			
2	Select gender.			
3	Enter the first name and last name.			
4	Enter a valid email address.			
5	Enter 12345 in the Password field.			
6	Enter 12345 in the Confirm Password field.			
7	Click the Register button.			
Expected Result	The system should reject the registration and display the validation message indicating that the password must contain at least 6 characters.			
Actual Result	Registration was rejected, and the password validation message was displayed.			
Status (Pass/Fail)	Pass			

Test Case 23:

Test Case ID	TC-23			
Module	Homepage (Search)			
Test Scenario	Verify search functionality with the minimum valid search term length (3 characters).			
S#	Precondition		S#	Test Data
1	User is on the Homepage.		1	Search Keyword: Lap
S#	Test Steps			
1	Open the Homepage.			
2	Enter "Lap" (3 characters) in the search box.			
3	Click the Search button.			
Expected Result	The system should accept the search term and display matching products or a "No products were found" message if no matching products exist.			
Actual Result	The search was processed successfully.			
Status (Pass/Fail)	Pass			

Test Case 24:

Test Case ID	TC-24
Module	Homepage (Search)

Test Scenario	Verify search functionality with a search term below the minimum required length (2 characters).			
S#	Precondition		S#	Test Data
1	User is on the Homepage.		1	Search Keyword: La
S#	Test Steps			
1	Open the Homepage.			
2	Enter "La" (2 characters) in the search box.			
3	Click the Search button.			
Expected Result	The system should not perform the search and should display the validation message: "Search term minimum length is 3 characters."			
Actual Result	The validation message was displayed and the search was not performed.			
Status (Pass/Fail)	Pass			

Test Case 25:

Test Case ID	TC-25			
Module	Product			
Test Scenario	Verify that the system does not allow adding a product to the cart with a quantity of 0.			
S#	Precondition		S#	Test Data
1	User is on the Product Details page.		1	Product: Build your own computer (or any available product)
2	Product is available for purchase.		2	Quantity: 0
S#	Test Steps			
1	Open the Demo Web Shop homepage.			
2	Navigate to any available product.			
3	Open the product details page.			
4	Change the Quantity field value from 1 to 0.			
5	Click the Add to Cart button.			
Expected Result	The system should not add the product to the shopping cart and should display a validation message indicating that the quantity must be greater than zero.			
Actual Result	The product was not added to the shopping cart, and the validation message "Quantity should be positive." was displayed.			
Status (Pass/Fail)	Pass
