# HisabDo – User Feedback & Product Review Report

## 1. Objective

The purpose of this activity was to evaluate the HisabDo mobile application from a user's perspective. The application was explored to understand its major features, ease of use, navigation and overall user experience. Feedback and suggestions were collected from users to identify different aspects of the application and possible improvements.

## 2. Features Explored

- Dashboard
- Receivable and Payable
- Transactions
- Customer Management
- Add Customer
- Reports
- Calculator
- Account/Profile
- Settings
- Authentication
- Guest Access

## 3. User Feedback

| User   | Feedback / Suggestions                                                                                          | Issues Found                                  | Recommended Improvements                                                        |
|--------|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------|---------------------------------------------------------------------------------|
| User 1 | Found the application simple and easy to understand. Liked the dashboard and quick access to important options. | No major issue observed.                      | A short introduction for new users could make the first experience even easier. |
| User 2 | Liked the Receivable and Payable features because they make it easier to keep track of money.                   | Needed a little time to explore some options. | Add brief descriptions for some features.                                       |
| User 3 | Found customer management useful and liked having customer information organized in one place.                  | No major issue observed.                      | More customization options could be added in future updates.                    |
| User 4 | Liked the calculator and transaction features and found them useful for everyday record keeping.                | Some features required initial exploration.   | Improve feature guidance for first time users.                                  |
| User 5 | Found the application useful and liked its overall simple design and financial management features.             | No major functional issue observed.           | Continue improving the UI and adding useful features based on user needs.       |

#### 4. Suggestions for Improvement

The feedback mainly consisted of small usability and enhancement suggestions rather than major problems.

| Area       | Suggested Improvement                                         | Priority |
|------------|---------------------------------------------------------------|----------|
| Onboarding | Add a short introduction for first-time users.                | Medium   |
| Navigation | Make frequently used options even easier to find.             | Low      |
| Guidance   | Add brief descriptions or tooltips for selected features.     | Low      |
| UI         | Continue improving visual consistency and overall design.     | Low      |
| Features   | Consider adding more customization options in future updates. | Low      |
